Summary

Technical professional experienced as an Associate Software Engineer at Accenture. Skilled in Python programming, SQL, and analytical data handling, with hands-on experience in corporate log analysis and technical troubleshooting. Adept at executing structured data cleaning, analytics pipelines to drive optimized entry-level Data Analyst solutions.

EXPERIENCE

Associate Software Engineer | Accenture

Nov 2024 – Aug 2025

- Monitored system logs and network alerts to resolve incidents, improving efficiency by 15%.
- Managed incident workflows via ServiceNow, maintaining a 98.5% SLA compliance rate.
- Executed root cause diagnostics on infrastructure, reducing localized network downtime by 11%.

Data Analyst Intern | InnoByte Services

Apr 2026 – May 2026

- Evaluated Amazon transactional data using SQL, identifying 3 distinct product growth opportunities.
- Performed data cleaning, transformation, and EDA on datasets, improving data integrity by 22%.
- Generated analytical cross-regional reports, enhancing supply chain visibility by 18% across 4 main zones.

Data Analysis Intern | SYNTECXHUB

May 2026 – Jun 2026

- Designed 5+ data extraction pipelines for enrollment metrics, handling datasets exceeding 10,000+ entries.
- Performed cleaning, EDA, and KPI tracking, reducing dashboard generation time by 4 hours weekly.

PROJECTS

Amazon Sales Data Analysis

- Scrutinized Amazon sales data using Excel and SQL, uncovering a 12% variance in sales velocity.
- Performed programmatic data cleaning and EDA, stabilizing forecasting model accuracy by 14%.

Customer Segmentation using RFM Analysis

- Calculated Recency, Frequency, and Monetary (RFM) metrics to segment bases across 4 distinct clusters.
- Identified unique consumer clusters and modeled behavioral insights to drive targeted data-driven corporate strategies.
- Coded a custom Python profiling script to model customer trends, optimizing target segment metrics.

Sales Performance Dashboard

- Built dashboards in Power BI and Tableau to track revenue, expanding profit visibility by 25%.
- Modeled global product distribution trends utilizing visual analytics to optimize resource allocation.

EDUCATION

SRM University | Master of Computer Applications (MCA)

2025 – 2027

- Specialization in Artificial Intelligence | Kattankulathur, Chennai

Amity University | Bachelor of Computer Applications (BCA)

2021 – 2024

- Graduated with a strong foundation in Computer Applications and Core Computing | Patna, Bihar

SKILLS

Languages : Python, SQL (MySQL)

Data Analytics : Data Cleaning, Extraction, Wrangling, Preprocessing, EDA

Visualization : Power BI, Tableau, MS Excel

Tools : NumPy, Pandas, Git, GitHub, VS Code, Reporting

CERTIFICATES

• **Introduction to Data Analytics** | IBM | Coursera

• **Power BI Data Analyst Track** | DataCamp

• **Python Data Structures & Algorithms** | Udemy

• **Data Manipulation in SQL** | DataCamp

• **Advanced Excel Formulas & Dashboards** | Udemy

• **Data Science & Python Visualization** | GUVI
